DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. **It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited.** The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

2. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 8, the phrase "the adjustment clip" lacks antecedent basis.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3628

4. Claims 1-5 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurxthal, U. S. Patent 4,567,682. Hurxthal teaches a mobile sculpture and kit for making comprising a plurality of support members 22, securing or clip elements 34, elongated suspension means 24,35, and photographs secured to the suspension means. Hurxthal teaches securing at least one of the suspension means near the end of the support member utilizing securing or clip element 34. Hurxthal also teaches that the support member 22 does not have to be wire or rod stock but can be tubular, if desired. (See column 4, line 16-18). In addition, Hurxthal teaches that the securing or clip element 34 having a rounded C-shaped cross-section of a dimension conforming in part to the periphery of the support member 22. (See column 7, lines 21-25).

Claim Rejections - 35 USC § 103

5. Claims 7-9, 16, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurxthal, U. S. Patent 4,567,682. Since the applicant does not disclose that having the support tube fabricated from transparent material or having a arcuate shape and having the clip fabricated from a transparent material solves any stated problem or is for any particular purpose, it appears that construct the tube and clip of any suitable material and in suitable shape would perform equally well in supporting the display items.

Allowable Subject Matter

6. Claims 6 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3628

7. Claims 18-20 are allowed.
